EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science Engineering with Specialization in Data Science

CGPA: 9.22

Vellore, Tamil Nadu
September 2022 - Present

Chrysalis High - Higher Secondary

Physics, Chemistry, Math, Biology - **CGPA: 9.52**

Bangalore, Karnataka
2021 - 2022

PROJECTS

1. SafeSpace - AI- Powered Women's Safety Platform [link](#)

Project lead - Team of three

Jan 2025 - April 2025

- Developed a machine learning-based web platform to generate dynamic safety scores for locations
- Uses real-time data such as lightning and population density along with past crime rate data
- Designed the ML pipeline and data ingestion workflow using TypeScript and Python

2. READefine - Chrome Extension for Dyslexic Readers [link](#)

Developer and Publisher

Jun 2025 – July 2025

- Built a browser extension using TypeScript and Chrome APIs to enhance reading accessibility for neurodivergent users
- Enabled text customization features like font selection, spacing, hover to highlight, syllable-emphasis and background contrast

3. LangChain-Powered Custom Chatbot [link](#)

Developer

February 2025 – March 2025

- Created a domain-specific chatbot using LangChain and web-scraped content on crime datasets, via BeautifulSoup
- It is conversational assistant capable of generating relevant responses

4. Automated Invoice Extraction Tool [link1](#) [link2](#)

Developer

April 2025

- Built an OCR and Regex pipeline using UiPath Studio to extract invoice data and structure it in Excel
- Reduced manual processing time by 80%

CERTIFICATIONS

- AWS Certified Cloud Practitioner - Score: 914/1000
- AWS Certified Solutions Architect - Associate Level
- Oracle Cloud Infrastructure AI Foundations- Score: 100/100
- CS50 - Introduction to AI with Python- Harvard Certification
- Letter of Recommendation as Business Analyst from Finlatics

TECHNICAL SKILLS

- Programming Languages: Python (Advanced), R (Intermediate), Java (Intermediate)
- Data Science and Analytical Tools: Libraries - Pandas, NumPy, Matplotlib; PowerBI
- AI/ML Frameworks: LangChain, Scikit-Learn
- Web Technologies: HTML, CSS, JavaScript
- CS Concepts: Data Structures, Algorithms, OOP

EXPERIENCE

Business Analyst with Data Science - Finlatics Experience Programme

Remote | March 2024 - May 2024

- Conducted case studies on companies like Twitter, OYO, YouTube, Netflix and Zudio, analyzing their business models, growth strategies and market positioning.
- Developed interactive Power BI dashboards to visualize key insights, KPIs and market trends.
- Trained to apply business strategy, competitive analysis and financial metrics in real-world scenarios.
